SIMPLEX®

9600 Series Cabinet Lock

9600 Series Cabinet Locks

Cabinet Locks

Pushbutton cabinet locks offer convenience, security and safety for a variety of applications including, but not limited to cabinets, lockers, desk drawers, gun safes, wall safes, liquor cabinets, tool boxes and anywhere a cam lock is used.

Our cabinet locks use the same proven combination system as our other pushbutton access controls.

The end user selects and sets their own personal code, which they can change in seconds without removing the lock from the door. Available for use in wood or sheet metal applications, the Kaba cabinet lock provides security and eliminates key hassles. The 9600 cabinet lock eliminates the problems of keyed locks:

No more:

- lost or stolen keys
- broken keys
- service calls or rekeying costs
- keys to control
- keys to hide
- keys to duplicate

Mechanical Features

Construction: All metal, cast face plate

Installation: Horizontal or vertical. Two-step mortise installation using router or 5 5/8" (140 mm) x 1" (25 mm) slot with trim plate (for wood applications). Punched slot or series of 7/16" (11 mm) drilled holes (for metal applications)

Door handing: None
