

LYNX Plus Security System

SECURITY MADE SIMPLE FOR
YOUR HOME AND FAMILY

Protected and Connected

Honeywell

Stay Safe, in Touch and in the Know with LYNX Plus

For peace of mind, you need to know that what you cherish most—your family and your home—are safe and secure.

Look no further than Honeywell's LYNX Plus security system.

LYNX Plus provides superior, round-the-clock security—protecting your property and the people you love. But LYNX Plus does so much more than keep you safe.

When used with Total Connect Remote Services, LYNX Plus enables you to receive important alerts, keep a close eye on your home and control your security system remotely via the Internet and the same mobile devices you use each and every day.

- Arm, disarm and check the status of your security system via your PC, laptop, cell phone, BlackBerry®, iPhone™, iPod touch® or any compatible wireless handheld device
- Receive e-mail alerts about important events, including:
 - When your children arrive home from school
 - When flood or extreme temperature change is detected
 - When a safe, liquor cabinet or doors to restricted areas have been opened
 - When motion is sensed in a protected area
 - If a protected asset is moved (e.g. a painting, flat screen TV, etc.)
- Multiple account capability—great for vacation homes and investment properties

Isn't it time you got connected? Ask your security professional for details today!

Security Made Simple

The user-friendly LYNX Plus puts security and convenience at your fingertips. The vibrant, easy-to-read display is easier to use than traditional security systems—announcing the exact type and location of an alarm in plain English and giving you the information you need so you can react quickly. Sleek, stylish and portable, it blends with any décor and can be placed on a wall or tabletop.

Two-way voice communication with the central station operator through the alarm system helps ensure that the proper emergency response personnel will be dispatched to your home.

The “Follow Me” feature enables the system to call and alert you to alarms and important reminders.

Home control options enable you to turn lights on or off and control garage doors with the touch of a button.

Compact, stylish sensors can be custom-painted to match any décor. You can also protect doors, open areas and windows with contacts, glassbreaks and motion sensors.

Monitored wireless smoke, heat and carbon monoxide detectors protect you and your family from life-threatening hazards.

The Family Message Center lets everyone record and playback voice messages for one another.

Wireless keypads announce system status in clear, spoken English.

Wireless Asset Protection Sensors can alert you when an attempt is made to move or disturb valuable objects within your home.

For Peace of Mind

Insist on Honeywell

When it comes to security, comfort and convenience, homeowners look to Honeywell. In fact, more homes in the United States and Canada are protected with Honeywell security systems than by those of any other manufacturer. At Honeywell, we recognize that true security comes from knowing you've made the very best choice for your family's protection.
